A WORD ABOUT OUR 6 IN 1 GAME CARTRIDGE

Welcome to Caltron's 6 IN 1 MULTIPLE GAME cartridge.

Through many years design and development, we are very pleased and as well excited to offer you the first of its kind in the video game industry-Multiple Game Cartridge.

As you can clearly see, 6 IN 1 indicates six exciting games on one single cartridge. This is our first introduction, with many more to follow, within a short future.

The current six games are carefully chosen to cover the taste and interest of all ages, young and old; from amateurs to the pro; from action packed game such as space war to evenly paced I.Q. testing game. We believe the games will offer you many hours of enjoyment as well as excitement. At the same time, in a nostalgic sense, you will probably be plunged back, way back into the genesis of our existence; as the scenery changes, you are reminded about the mysterious legend of the genie. Then again, who can resist the temptation of indulging in an imaginative trend. After all, that is what life is about—it’s only a game!

All the games consist of multiple stages, or levels. It is a challenge! It’s fun! It’s exciting! We hope you will enjoy it, as much as we do. We also would like to hear about your comments. In back of this pamphlet, there is a small questionnaire. Please take a moment to fill out, give us your honest opinion, what you like or dislike. Our future game cartridge will be based on the opinion from people like you!

The main idea of this game is to emphasize the theory of "To exchange Time with Space." Even though this game does not have time limitations, however, the bouncing of the Balloon becomes lower and lower until it rolls on the surface and leaves no space. The game then cannot be continued as if time is over.

The other feature of this game is the splitting of the Balloon. When a Balloon is being hit by a bullet, it splits into four small ones. You must hit all the Balloons before they all disappear. Therefore, you must try to hit the Balloon when it is at its highest bouncing height, thereby you will relatively gain more Time to hit the Balloons. Otherwise, the Balloons fall lower and lower, which represent the Time left is becoming shorter and shorter. When you hit and all the Balloons disappear, then you will go into another level.
